Foxp3+ Treg cells in humoral immunity
J. B. Wing and S. Sakaguchi

Original Research Papers
71 Novel NLPR3/cryopyrin mutations and pro-inflammatory cytokine profiles in Behçet’s syndrome patients
Ş. Yüksel, E. Eren, G. Hatemi, A. C. Sahillioglu, Y. Gütekin, D. Demiroz, C. Akdağ, İ. Fresko and N. Özören

83 Hypoxia-induced and A2A adenosine receptor-independent T-cell suppression is short lived and easily reversible

93 Early pathological alterations of lower lumbar cords detected by ultrahigh-field MRI in a mouse multiple sclerosis model

103 Featured article of the month. T2-type inflammation instructs inflammatory dendritic cells to induce airway hyperreactivity

Featured Article
Inflammatory DCs are crucial for the development of airway hyper-reactivity

Review
Treg cells use a wide range of mechanisms to regulate B-cell responses
